## OBJECTIVE

From a young age, I nurtured a strong passion for languages, which led me to a degree in Intercultural Language Mediation with specialisations in Portuguese and German. Later, I developed an interest in computer science and programming, undertaking a master in this field.

My professional goals are to combine my language and computer skills to work in international contexts, facilitating intercultural communication and contributing to innovative technological solutions.

## EXPERIENCE

### INTERNSHIP

Rome | Jan 2020 - Nov 2020

During my internship at Sapienza University, I taught political economy to Chinese students, developing teaching materials and facilitating understanding of complex concepts.

### TUTORING

Rome | Feb 2021 - Sep 2022

During my university studies, I tutored Portuguese for undergraduates and high school students, enhancing my language and communication skills.
